PROFESSIONAL PROFILE

I am a Systems Engineer who is constantly learning, with the ability to adapt and take on different roles in projects. I work collaboratively, promoting team efficiency and cohesion. I am characterized by being accomplished, organized and focused on delivering high-quality results within established deadlines.

WORK EXPERIENCE

MAZZI Arquitectos - Colombia   August, 2024 - September, 2024

Frontend Developer, UI/UX Designer, DevOps Engineer

- Mazzi Arquitectos dreamed of a greater presence in the market, improving interaction with potential clients and highlighting their completed projects. Together with them, I developed a Landing Page that met all the technical requirements, which resulted in a significant improvement in the company's objectives.

UFPS - Colombia   April, 2024 - July, 2024

QA Analyst Internship

- I performed a detailed analysis of a JBoss 4.2.3-based Payroll and Human Resources Administration System, its architecture, existing functionalities and detected errors. I documented all the information to establish the basis for the development of a new version of the payroll software.

GetMoney - México   October, 2023 - April, 2024

Frontend Developer, UI/UX Designer

- GetMoney aimed to enable users to reserve foreign currency at over 2,000 exchange centers and 5,000 bank branches. In collaboration with a startup, we developed a web application that integrated functionalities such as the possibility of convenient appointment scheduling and a geolocation system to locate the nearest locations, always guaranteeing the best option.

Calzado Andrea Navarro - Colombia   March, 2023 - July, 2023

FullStack Developer, UI/UX Designer, DevOps Engineer

- Andrea Navarro Footwear wanted an e-commerce to strengthen its presence in the market, automate order management, integrate shipment tracking and a payment gateway, all while ensuring an excellent user experience. As a Full Stack Developer, I created a platform that met all requirements, exceeding the expectations of the company and its customers.

IPS Sanarte - Colombia   August, 2022 - November, 2022

Frontend Developer, UI/UX Designer, DevOps Engineer

- Sanarte IPS wanted to publish information about its services and an efficient solution to manage and schedule appointments. To solve this, I developed an informative Landing Page that centralized all the relevant details about the institution. In addition, I implemented an email sending system to facilitate appointment scheduling, improving interaction with patients and optimizing their management.
